

Basic Game Story

Between two Countries a border exists. This area, between Turm and Old Patria, has been long contested. To one side it is known as Summerset, to the other it is called Englefeld, both vie for control of this area. It's verdant fields and it's dense forests could be home to a most prosperous city. Sadly, the area lies in ruin. Constant shelling and bombings have left the once beautiful area a desolate wasteland, a mere memory of the beauty it once held. A tentative ceasefire had been declared some ten years ago but recently, vicious raids have been inflicted upon the towns that lie closest to the border. Mutilated bodies, whole towns razed, women and children murdered in the streets, and both Turm and Old Patria are looking for someone to blame. Naturally they chose each other.

- Old Patria = United Kingdom & France ⇐ Blue
- Turm = Germany ⇐ Green

Remember that we're thinking world war one so keep that in mind with the uniforms. Maybe a little exaggerated since we're going with steampunk. I want the guns to be a little shorter and bulkier than they normally would be. Also, The tank should have a large squat barrel. I'm thinking we want to focus on power over finesse in the general design.

Light infantry

- we can have simply rifles and bayonets on both sides just different uniforms

Heavy infantry

- Old Patria- electricity launchers
- Turm- big rocket launchers

Cavalry

- Old Patria- armed infantry on clockwork horses
- (Floating Bioshockish blimp thing)
- Turm - armed infantry on steam powered motorbikes
- (old style first type helicopters)

Light Armored

- Both jeep/ATV type vehicles with mounted turret

Medium Armored

- Both tank with short fat barrels

Art assets 64x64 and 32x32

- Animations 2 frames running maybe idle
- Menu texture (main menu, in-app purchases, map selection, CO selection)
- terrain (plains, mountain, forest, roads (maybe), river)

(later)Personnel Carrier

- Old Patria- Sky Ships?
- Turm- heavy squat apc

(later)Artillery

- Old Patria- lightning generator attached to a tank or heavy armored truck
- Turm- think like a mix between a howitzer and a gatling gun

got to do more research. I'll finish this later.
